Experience the grounding of earth and the solidity of Self on an unstable platform. You'll be introduced to 'standing tall' in the grass, supported by the trees and birds, and led in the practice of quieting the critical, judgmental mind in a new way.

New Earth Mentor David Nelson (NewEarthMentor.com) and Randy Johnson will lead this session, beginning with some stillness practice, movement practice, mindful walking and stand up paddle. The practice is to let go our obstacles to Love, to connection, allowing self to settle into

Self...to stand tall in our presence, no matter what.

*Come wander in the wonder of the mystery with us. You can't stop the wave, but you can learn to **ride it**.*
